3. Record of interview with patient (Include where it was conducted who was present and use of police if required during process)

---

Mr Cordell was assessed under the Mental Health Act at around 10:40hrs on 03.02.16. Dr Al-Allaq (independent s12 Doctor), Dr Albazaz (independent s12 Doctor), CJ and Nellie (Home Treatment Team workers), Amal Pomphrey (Community Mental Health Nurse based at Enfield Early Intervention Team) all attended. A s135(1) warrant was obtained but not executed as Mr Cordell gave access. A lock smith was present but their services were not required as Mr Cordell opened the door. The police were present but remained outside the property.

Mr Cordell's home was somewhat cluttered with a large printer by the door. However, it was clean and organised. He had food in the kitchen.

His mother and a female friend were present. Mr Cordell was expecting the assessment to take place. He was appropriately groomed and dressed. He had put his dog in the garden. Mr Cordell expressed his unhappiness about the warrant being obtained. He said that if he had been sent an appointment letter, he would give professionals access.

He mentioned on going issues with the police and that he had a court case in February. His speech was somewhat rapid at the start of the interview but this appeared to be due to anxiety rather than thought disorder. His speech slowed as the interview went on. Mr Cordell did change topic of conversation a number of times as there was particular information that he wanted to share with the team. He spoke a project to start a community internet site and showed those present a business plan that was on his computer. He showed us documents which he said were related to his court case. He pointed out a line in the document that said that all the suspects were white and said that this was part of his legal challenge to his Anti-Social Behaviour Order.

He denied any symptoms of mental illness when asked about a variety of psychotic symptoms. He denied suicidal ideation. He spoke about difficulties he had with his upstairs neighbour relating to noise disturbance. He showed us some letters which said that his neighbour had written to him. He said that his neighbour has an alcohol problem and a learning disability.

There was no evidence of distraction, confusion or that he was responding to internal stimuli.
