

Simon has been generally settled.

Bessie Ward Mgr spoke with Simon's father - father reported that another family member was prescribed Clozapine which had to be immediately stopped, he is concerned that we proceed cautiously with any prescribed medication for Simon. Father earlier reported his concern that Simon's swollen finger was being neglected, I understand he spoke with Bessie about same.

Ibuprofen, 400mg, oral tablets given to Simon for painful swollen finger.

Meals attended.

Socialised with peers.

First thing this morning Simon communicated that he was unhappy about another patient M.A. being on the ward, agitating, intimidating and upsetting other patients including himself, related other patients shared his opinion that other 'aggressive' patient should not be on this ward and be moved elsewhere, said he could not guarantee not 'taking on' M.A., 'I don't want to go back to prison, I'm on an ASBO.....I will defend myself.....' I counselled Simon to maintain his distance, not to take matters into his own hands, not involve himself with M.A., to report any concerns to nursing staff for staff to manage any challenging/aggressive behaviour and in so doing maintain the welfare and safety of all persons.

Spoke to Simons mother over the phone. Explained the changes to meds as outlined in the below entry.

Simons mum is unhappy, she said we are starting too many drugs at once. She said 'what you are trying to do is put everything in his way - so it goes against him when hes refusing medication. Now he's going to have this on his record, i feel your putting things in his path.'

I explained that the consultant feels that this medicine will be beneficial to his mental state which is why we have prescribed it.

Simons mum has also asked that we record all collateral history or mention of her in the notes as third party information as she does not want Simon to read it when he requests a copy of his notes. Please disregard all statements from his mother when providing simon with his medical notes. This has been discussed and agreed with Dr Humphreys.

Went to see Simon to explain chnages to medication.

Explained that we will prescribe lorazepam only at night for now as he does not want to take it during the day.

I have explained that the consultant Dr Cranitch would like him to be started on 5mg olanzapine. The patient was unahppy about this and said he will not take the medication as he does not think he needs it. I have explained that despite this we will still prescribe it and offer it to him if he would like to take it. I have explained that it will be beneficial to improving his mental health.
