

On the 10/04/2014 my son Tyrone Benjamin was in a bad motor bike accident which the police had to attend. My son Tyrone Benjamin was air lifted to The Royal London Hospital where he had suffered a bleed on the brain, a multiple injuries to his legs and hip and ribs. When the police came to my home they could not even tell me if he was alive or dead.

- Bleed on the brain
- Shattered left hip.
- Shattered left knee.
- Left Femur was broken in 2 places.
Tibia on his left leg was broken in 2 places and had released the bone out through his left knee.
- Fibula was broken in 2 places.
- Nerves are damaged in the left leg.
- Right Ankle was shattered and above the Right Ankle, and bones in his right foot broken.

He also had a few ribs that were broken.

The hospital could not do the operation that was needed for his left leg due to the bleed on the brain so had to try to align his legs and keep them in place.

The hospital did the 1st 8 hour operation 3 days later as they could not wait any longer the damage to the left leg was very bad. On this operation they tried to repair the hip and Femur the rest of the left leg and knee was put into a cage and they cleaned the lower left leg as the bones had broken the skin and was a big cause for infection they did not have time to do anything to the Right leg.

Around 5 days later they did the 2nd 8 hour operation. This was to try to fix the left knee and the lower left leg and the right leg. The doctors were and still are very worried that the bones are going to die in his left leg as it is not healing the way it should. Since the accident his left hip and knee was showing no signs of healing, around July 2014 the knee was looking better and had started to heal but the hip was still showing no signs of healing in Sep 2014 the doctors told us that if there were no signs of healing to the hip by the Nov 2014 they would have to replace the hip. on the
