

If you know an area or location of something you can add this to the search which will help with the results of your search.

A new keyword has been entered "illegal rave that was due to take place on the 6th June" I did not need to add 2014 in this keyword as it is in my custom date field still.

Any information I have given or will give in regards to this application has been found by ways of using my knowledge.

There are also many tools that I can use to help me in searching for information that is on the internet but for the information I have given or will give it has been done the way in which I have shown above.
