

check-up in Nov 2014 we had a little bit of good news the left hip had showed a little bit of healing so they was going to keep a close eye on it. But since the accident his has suffered from infection to the lower left leg, so has been on tablets to try and clear it but this has not worked. The doctors said they could not remove the plates, pins, screws and rods holding his left leg together, that they had to wait until it had healed more, so the infection in the lower left leg was just left to him taking tablets. in the Dec 2014 the infection was getting worse and the doctor said they are going to have to remove the plates, pins, screws and rods to that section of his lower left leg he had the operation for this on the 15/01/2015.

So how police officers could say Tyrone Benjamin was at a rave on the 07/06/2014 is beyond me Tyrone Benjamin could not walk was in so much pain and on very strong pain killers and needed care around the clock. The accident he suffered is life changing he still may need his hip and knee replaced, his bones can still die in his left leg. He has memory problems due to the bleed on the brain, the nerves are damaged in the left leg and he has no feeling down the outside of the left leg which the doctors have said will not come back. The left leg will be shorter or longer then the right leg but the doctors can not tell us which one as of yet. He is having very bad pain still and also very bad pain to his lower back and to date he is still on very strong pain killers. His left lower leg was infected since April 2014, but the hospital could not do anything but keep him on antibiotic tablets, this lasted until the 15/01/2015 when he had an operation to remove the plates, pins, rods, to that section of the lower left leg, there is still infection to the left lower leg but it has been better since the operation on the 15/01/2015

In March of 2014 my mother started to feel unwell, and we was up and down her doctors. The doctor did think it was her gallbladder so we were waiting for a scan date from the hospital. My mother was getting worse and feeling very unwell as time went on and the whole family was really worried.

On the 07/05/2014 she had an appointment at the hospital to see her oncologist due to in 2011 my mother having

- Bilateral Breast Cancer.
- Wild Local Excision and Sentinel Lymph Node Biopsy.
- Grade 2 Invasive ductal carcinoma T2 NO.
Right grade 1 invasive ductal carcinoma T1 NO.
- Both tumours ER positive, PR positive, HER positive.
She suffered from history of manic depression and was on Clozapine.
