

words they wanted to use to send it to the MP as what is stated in the Email to the MP is not correct on many points and I am very angry it has been written this way as no one has any right to say the things that have been said in the email the way they have been said is plainly wrong why would anyone write this email the way it has been written.

I would like this investigated as it seems the 1st investigation has done nothing to stop this sharing of my son's information without consent via the mental health team.

What right and laws are being used to share this information?

As it seems all the information that is being shared goes against my son. How is any trust meant to be gained when this is happening all the time? This is not the only information that is being shared and I can prove this.

I want all information sharing to stop forthwith with Enfield Council from the mental health teams across all departments, as it seems Enfield Council does not care how this information is being used or shared or if it is correct when they pass it on. From this point if any information is going to be shared with Enfield Council then the information needs to be sent to this email 1st and written consent obtained before any information is shared this would include all departments in the mental health team.

I have included your letter of response as I am also including in this email the MP as all this incorrect information that is being used against my son needs to stop from this point in time.

I have submitted a subject access request of all data being held for my son by the mental health teams, which I am awaiting as I need to correct a great deal of data being held and find out what other information has been shared.

I look forward to hearing from you regarding this complaint dated 28/11/2018

Regards

Lorraine Cordell
