words they wanted to use to send it to the MP as what is stated in the Email to the MP is not

correct on many points and I am very angry it has been written this way as no one has any

right to say the things that have been said in the email the way they have been said is painly

wrong why would anyone write this email the way it has been written.

I would like this investigated as it seems the 1<sup>st</sup> investigation has done nothing to stop this

sharing of my son's information without consent via the mental health team.

What right and laws are being used to share this information?

As it seems all the information that is being shared goes against my son. How is any trust

meant to be grained when this is happing all the time? This is not the only information that is

being shared and I can prove this.

I want all information sharing to stop forthwith with Enfield Council from the mental health

teams across all departments, as it seems Enfield Council does not care how this information

is being used or shared or if it is correct when they pass it on. From this point if any

information is going to be shared with Enfield Council then the information needs to be sent

to this email 1st and written consent obtained before any information is shared this would

include all departments in the mental health team.

I have included your letter of response as I am also including in this email the MP as all this

incorrect information that is being used against my son needs to stop from this point in time.

I have submitted a subject access request of all data being held for my son by the mental

health teams, which I am awaiting as I need to correct a great deal of data being held and find

out what other information has been shared.

I look forward to hearing from you regarding this complaint dated 28/11/2018

Regards

Lorraine Cordell
