TIPS to make the most out of VoiceBase

- The quality of a recording has a tremendous impact on machine transcription. A bit better quality will give a lot better transcription results. Echoes and background noise are detrimental to machine transcription and should be minimized.
- Most smart phones record well if close to the people speaking. VoiceBase has Android and iOS apps which record and upload to the VoiceBase website.
- If you are interested in using VoiceBase or our transcription and search engines for your own projects, please contact us regarding integration or API use.

Sincerely,

Your VoiceBase Team
