

# Allocating Council and Housing Association Homes in Enfield

## Target Allocations

Each year the Council will give guidance on the number of households to be rehoused for each Demand Group.

## Deciding how many homes will go to the Demand Groups

Before the start of each financial year the Council will estimate the number of Council and housing association homes in Enfield likely to become available for letting in the coming 12 months.

Homes for older people will be allocated to applicants in Group 6.

Level access, ground floor, mobility- and wheelchair adapted homes will be allocated to applicants in Group 5.

When sharing out the remaining Council and housing association homes

- The Council will estimate the percentage of general needs homes required for Group 2 applicants who need to move under the Council's estate regeneration plans and the number of homes required for care leavers in Group 3. A percentage of homes will be allocated to these groups.
- The Council will give a percentage of the remaining homes to each group of applicants in Groups 1, 3, and 4
- A maximum of 5% of relets<sup>8</sup> will be put forward for Group 1 applicants under the Mayor of London's pan-London Mobility Scheme called "housingmoves".

---

<sup>8</sup> Relets are homes which have been let before and have become available again for letting. They do not include homes that are newly built and have been handed over to Council to be let for the first time.
