

Latter when back on the hospital wing all alone I got forced to take Lorazepam and got given a pliff leaflet because I complained about being prescribed medication blind, asking for one.

I explained that I did not need to take the medication and that I already have a good sleep routine in place, to the extent that I do not need an alarm clock, as I get up perfectly fine by myself at 5:30 am each morning.

In overlaying my opinion I also explained that I am a very tidy person and like to keep, washed and clean by 6:00 am and this means that normally by 6:30am, I am ready and delegated to finishing of my agendas towards my companies best interests, and back to sleep again by 10:00 pm.

Sally Guilhurst sent me a letter schedulable of incidents added forged witness

Chapter 666

18/08/2016 I was asked to take an ECG test on this day and was more concerned with my fingers on showing them to the Junior Doctor; he was very pleasant but did not send me for x rays as I needed and clearly requested.

On the 18/08/2016, I again asked for the incident report book to get updated, so as for any person to be able to explain the damage caused to my fingers.

When on the 18/08/2016 at around 11:00am I showed a doctor the damage to my hands, fingers, the reason I had gotten given the opportunity to show a doctor was because, he had asked me to take part in some routine checks, such as checking my heart rate, I showed the doctor the damage to both my fingers, I also expanded to the doctor the pain I was in and therefore suffering and that I required emergency assistance such as an x-ray.

It then got explained to me that even low my left finger looked snapped they believed it to be swollen, I knew this not to be fluid in my left finger and for it to be part of my bones snapped, it also got explained to me by the doctor, that my right finger will heal and gain movement over time to which it still has not and never will again, at the time I challenged this to the maximum extent.

When Comparing the snap to both of my small index fingers, I class my right finger to be a lot worse for the reason being that I have lost full control of it and can no longer use it, not having any use of my right small finger has a large effect on my daily life for incidence I can no longer write with a pen as I once could and I also find that I have issues with picking anything up as I once could before.
