Dear Mike and Mat Hello how are you doing, I hope all is well I spoke to a gentleman on the 24/04/2017 on the phone called mike in regards to a Morgana pur 150 that I am interested in purchasing from another person, mike then passed the phone to a man called Mat, who then asked me to send this reply.

The machine I am able to buy seems to come with its own problems and I request your help in solving the issues.

Diagnostic; when the machine is first turned on it allows any user to go to the first stage which is; "Are you trained to operate this machine" once ticked in agreement the power to the machine will flip the main distribution power supply but does not blow the machines internal fuses.

On a diagnostics of the problem, you have to take the two covers of the back of the machine and bypass the safety mechanism for the hatch door being closed. Connected to the bottom of the glue station, to which you put the glue into is a thermostat, this thermostat has two additional wires connected to it.

The marks on the thermostat state's that it is a; Mfr. Part No. 2455RC Thermostat, Solder Tag Termination, 0°C +260°C When disconnected and the machine is rebooted with power it will bypass to the second stage; "Main menu" Once into the main menu, the machine goes into alarm mode, in turn, disabling its features.

The features that seem to be disabled are the following:

1. milling station: -

2. Press carriage; On a further inspection towards the resolution of the error codes; they are labelled as follows:
