

I continued to report my concerns about my well-being, with regard to my fingers with no true aid in emergency medical assistance apart from being prescribed ibuprofen an anti flamer tries and having my fingers taped together.

I know that any person can clearly see the break in my left finger to date. I, am still in continuing pain due to the way it has repaired incorrectly and this is due to the lack of duty to or of care, I know this has caused lifetime injuries to my ability's of my hand, in turn causing the absinthe of any use from my left small finger, this really upsets me as I now feel disabled due to this accident and I know if I had my own liberty at the time I would have gone and received the medical help I needed, relating towards my Health. Also in me explaining to the doctor that I would not be happy with taking Lorazepam in the morning and day times, as I needed to work on my statements for the up and coming appeal, he did agree, so that I would only have to take the tablets at night, to which I was happy with, that night when going to take the medication I noticed a white tablet rather than a blue one like what got given to me the night before and asked the name of the medication from the prescriber and I got told clozapine tablets, which is an antiseptic medication.

I asked if the dosage was stronger than the blue tablet and if they had the same effect and I got told no, to which I still had never taken the blue tablet before.

Nobody gave me a mandatory plifs leaflet nor a consultation in regard to the medication change, so I made a phone call to my mother and explained all to her, she soon after phoned the hospital with her upset in a consultation about the issues raised of concern.

Another inpatient was waiting to speak to staff on this day and had waited outside of the staff room, the office door got closed to ajar, in him waiting the trouble maker from the 16th of August had decided to cause conflict. He deliberately caused a negative interaction when he came along and started another altercation with the standing inpatient, this made me worried about the standing inpatient, and other patients inclusive of mine and the safety of all the medical staff's team, then straight at that instance the trouble making inpatient got restrained by staff and I went back quietly into my room.

Chapter 666
